The Angel of Salonika Vesna Goldsworthy 2011 The Angel of Salonika is a haunting, multi-layered book about place, language and remembrance, and the way they make us who we are. Winner of the Crashaw Prize, it is a first collection of poetry by a bestselling memoir writer, broadcaster and British university professor who grew up in communist Yugoslavia but then moved to London. The collection begins and ends with the same summer in Macedonia thirty years ago, and tells the story of a vanished Balkan homeland but it also describes learning to live, love - and write poetry — in a new language. Goldsworthy's poems are both melancholy meditations on a lost world, deeply permeated with a Chekhovian feeling of transience, and witty and often acerbic celebrations of London here and now — of its rivers of humanity, the secrets lurking behind its terraces, in its churches, mosques and temples, its street markets and railway stations, and almost empty restaurants during late afternoons. This is a well-travelled book, packed with memory and incantation, conjuring landscapes and people. It is beautifully written and, like all great poetry, it forms an ideal, entertaining companion.

The Governance Report 2019 The Hertie School of Governance 2019-09-27 Health promotion and protection for all citizens and health care for patients represent some of the most important policy challenges worldwide. Health governance involves state, market, non-governmental, professional, and individual actors often working across sectors and depends on interactions at multiple levels-from local clinics to global forums. I Will Survive Gloria Gaynor 2014-03-11 I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

Design for Services Anna Meroni 2016-04-08 In Design for Services, Anna Meroni and Daniela Sangiorgi articulate what Design is doing and can do for services, and how this connects to existing fields of knowledge and practice. Designers previously saw their task as the conceptualisation, development and production of tangible objects. In the twenty-first century, a designer rarely 'designs something' but rather 'designs for something': in the case of this publication, for change, better experiences and better services. The authors reflect on this recent transformation in the practice, role and skills of designers, by organising their book into three main sections. The first section links Design for Services to existing models and studies on services and service innovation. Section two presents multiple service design projects to illustrate and clarify the issues, practices and theories that characterise the discipline today; using these case studies the authors propose a conceptual framework that maps and describes the role of designers in the service economy. The final section projects the discipline into the emerging paradigms of a new economy to initiate a reflection on its future development.

Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent Friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life, beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought. For more than seventy years, Penguin has been the leading publisher of classic literature in the

Getting Health Economics into Practice David Kernick 2018-08-11 Fifty years ago medicine was straightforward. Doctors had limited therapeutic options and patients did as they were told. Today, an array of medial interventions is putting increasing pressure on limited resources, patients are questioning everything and doctors are uncertain of their role. Health economists hoped to offer important insights to aid decision making, but their technical frameworks bore little resemblance to the practical requirements of end users. Now, this book presents the concepts and insights that health economics has to offer in a way that is accessible to every healthcare decision maker. *Getting Health Economics into Practice* is for all those who are involved in the planning, commissioning and delivery of healthcare. It illuminates the practical value that the concepts and principles of health economics can offer decision makers at all levels. Comprehensive and extensive, it is the first such book to be edited by a clinician rather than a health economist, with contributions from an expert panel of specialists. This approach ensures it is accessible and useful in the everyday work of health professionals. It is relevant for all healthcare sectors, in particular for Primary Care Trusts, and is essential reading for managers, researchers, and especially practitioners.

The Forgotten Rohingya: Their Struggle for Human Rights in Burma Habib Habib Siddiqui 2019 Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting

education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Design Pedagogy Mike Tovey 2016-04-22 *Design Pedagogy* explains why it is vital for design students that their education helps them construct a 'passport' to enter the professional sphere. Recent research into design teaching has focused on its signature pedagogies, those elements which are particularly characteristic of the disciplines. Typically based on core design theory, enlivened by approaches imported to the area, such work has utility when it recognizes the visual language of designing, the media of representation used, and the practical realities of tackling design questions. Increasingly the 21st century sees these activities in a global context where the international language of the visual artefact is recognized. This book draws on recent work in these areas. It includes a number of chapters which are developed from work undertaken during the period of special funding for centres of teaching excellence in the UK up until 2010. Two of those in design have provided the basis for research and innovative developments reported on here. They have helped to enliven the environment for design pedagogy research in other establishments which are also included. Design students need support for the agile navigation through the design process. Learning experiences should develop students' natural motivations and professionalise motivation to create a resilient, informed and sustainable capacity. This is the essence of 'transformative learning'. This collection explores how design education is, in itself, a passport to practice and showcases how some of the key developments in education use techniques related to collaboration, case studies and experience to motivate students, enable them to express their identity, reflect and learn.

The Royal Navy Day by Day A. B. Sainsbury 2005-01-01 The Royal Navy Day by Day is a fascinating record of British naval heritage. It is preserved here as a diary of daily events - not just of great battles, but of all that has built the Royal Navy's 700-year-old tradition. While so many books of naval history concentrate on the big events, The Royal Navy Day by Day examines also the conditions that sailors, Royal Marines and naval aircrew, as well as Army and RAF forces involved in sea and amphibious operations, have experienced in peacetime as well as war. First published in 1979, the original book needed to be brought up to date and to reflect the Royal Navy's significant involvement in the Falklands and the First Gulf War. This led to a substantial updating and revision of the text and photographs in the Second Edition published in 1992. With the Royal Navy's heavy involvement in peacekeeping and offensive actions worldwide since 1992, a third edition has become necessary. This Third Edition has been thoroughly revised and updated to include the principal operational and administrative developments in the Royal Navy since 1992. It has been completely re-illustrated.

Getting Over Europe Zoran Milutinović 2011 The book examines the discursive construction of the representation of OC EuropeOCO in the selected writings of leading Serbian writers and intellectuals in the first half of the twentieth century. In addition to being of particular significance in the process of the genesis of our understanding of Europe across the continent, these several decades were crucial for the discursive construction of OC EuropeOCO in Serbian culture: when after the end of the Cold War the debate on Europe became possible again, it was on a discursive level to a large extent determined by the stockpile of images and ideas created between the world wars. The book seeks to answer the following questions: who constructed OC EuropeOCO, and with what authority? For whom were these constructions intended? How was this representation validated? What purposes was it meant to serve? Which issues were raised in comparing OC EuropeOCO with Serbia, and why? Which textual traditions were the elements of this construction borrowed from? How did the construction of the European other define Serbian self-representation? This volume is of interest for all those working in Slavic or East European studies -

especially cultural, intellectual and political history of the Balkans - imagology, and European studies."
