*My Family's Soybean Farm* Katie Olthoff 2022-09-13 Meet Alexander and Charlie - the farm boy and his helpful dog who narrate the busy life of a modern, working soybean farm in this fun and informative picture book about a family growing one of the top crops of American agriculture The busy days and many jobs of a farm family, the life cycle of a soybean plant, and its life as a crop getting to market are all detailed in My

Family's Soybean Farm, a picture book on what it takes to grow soybeans, and how the crop becomes the many products we use every day. Each spread walks readers through the many steps of planting and growing the crop throughout the seasons, with extensive text features placed beside the story offering range of additional information for readers, from STEM concepts to illustrations of farm equipment, diagrams, and more. The family's working together is highlighted throughout, across traditional roles and with modern-day tech: Alexander watches as Mom drives the tractor in a modern cab complete with GPS technology, and later, he and Dad check the crop both with age-old techniques like walking the fields ("crop scouting") and by using the latest drone technology, too. Detailed drawings show the life cycle of the soybean crop, as well as diagrams on larger concepts, like how soybeans are alternated with corn for soil preservation. Illustrations and information about literally every farm vehicle and other vehicles involved in growing soybeans and getting them to market are also here - including tractor and planter, sprayer, wagons and grain bins, processors, and finally, even barges and trains to get the crops to markets both domestic and around the world. Spreads also show how soybeans are used in a range of products, from Charlie's bowl of dog food, to foods like soy sauce, feed for farm animals, and more. About the publisher: Feeding Minds Press is a project of the American Farm Bureau Foundation for Agriculture whose mission is to build awareness and understanding of agriculture through education. **In Schools We Trust** Deborah Meier 2003-08-01 We are in an era of radical distrust of public education. Increasingly, we turn to standardized tests and standardized curricula-now adopted by all fifty states-as our national surrogates for trust. Legendary school founder and reformer Deborah Meier believes fiercely that schools have to win our faith by showing they can do their job. But she argues just as fiercely that standardized testing is precisely the wrong way to that end. The tests themselves, she argues, cannot give the results they claim. And in the meantime, they undermine the kind of education we actually want. In this multilayered exploration of trust and schools, Meier critiques the ideology of testing and puts forward a different vision, forged in the success stories of small public schools she and her colleagues have created in Boston and New York. These nationally acclaimed schools are built, famously, around trusting teachers-and students and parents-to use their own judgment. Meier traces the enormous educational value of trust; the crucial and complicated trust between parents and teachers; how teachers need to become better judges of each others' work; how race and class complicate trust at all levels; and how we can begin to 'scale up' from the kinds of successes she has created.
