Arabic in the City Catherine Miller 2007-12-14 Filling a gap in the literature currently available on the topic, this edited collection is the first examination of the interplay between urbanization, language variation and language change in fifteen major Arab cities. The Arab world presents very different types and degrees of urbanization, from well established old capital-cities such as Cairo to new emerging capital-cities such as Amman or Nouakchott, these in turn embedded in different types of national construction. It is these urban settings which raise questions concerning the dynamics of homogenization/differentiation and the processes of standardization due to the coexistence of competing linguistic models. Topics investigated include: History of settlement The linguistic impact of migration The emergence of new urban vernaculars Dialect convergence and divergence Code-switching, youth language and new urban culture Arabic in the Diaspora Arabic among non-Arab groups. Containing a broad selection of case studies from across the Arab world and featuring contributions from leading urban sociolinguistics and dialectologists, this book presents a fresh approach to our understanding of the interaction between language, society and space. As such, the book will appeal to the linguist as well as to the social scientist in general.

Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary Truth and Reconciliation Commission of Canada 2015-07-22 This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology

for these events to true reconciliation that can be embraced by all Canadians.

A Handbook of Global Freshwater Invasive Species Robert A. Francis 2012-03-12 Invasive non-native species are a major threat to global biodiversity. Often introduced accidentally through international travel or trade, they invade and colonize new habitats, often with devastating consequences for the local flora and fauna. Their environmental impacts can range from damage to resource production (e.g. agriculture and forestry) and infrastructure (e.g. buildings, road and water supply), to human health. They consequently can have major economic impacts. It is a priority to prevent their introduction and spread, as well as to control them. Freshwater ecosystems are particularly at risk from invasions and are landscape corridors that facilitate the spread of invasives. This book reviews the current state of knowledge of the most notable global invasive freshwater species or groups, based on their severity of economic impact, geographic distribution outside of their native range, extent of research, and recognition of the ecological severity of the impact of the species by the IUCN. As well as some of the very well-known species, the book also covers some invasives that are emerging as serious threats. Examples covered include a range of aquatic and riparian plants, insects, molluscs, crustacea, fish, amphibians, reptiles and mammals, as well as some major pathogens of aquatic organisms. The book also includes overview chapters synthesizing the ecological impact of invasive species in fresh water and summarizing practical implications for the management of rivers and other freshwater habitats.

Child Well Being in Rich Countries UNICEF. Innocenti Research Centre 2013 This report compares child wellbeing in developed countries around the world. It includes 3 parts. Part 1 presents a league table of child well-being and details performance in the areas of material well-being, healthy and safety, education, behaviours and risks, and housing and environment. Part 2 looks at subjective well-being, and features a league table of children's life satisfaction. Part 3 examines changes in child well-being in advanced economies over the first decade of the 2000s, looking at each country's progress in educational achievement, teenage birth rates, childhood obesity levels, the prevalence of bullying, and the use of tobacco, alcohol and drugs. Note, Australia, Bulgaria, Chile, Cyprus, Israel, Japan, Malta, Mexico, New Zealand, the Republic of Korea, and Turkey were unable to be included in league tables, due to insufficient data, but their data is noted in individual sections when available.

Prudent Practices in the Laboratory National Research Council 2011-03-25 Prudent Practices in the Laboratory--the book that has served for decades as the standard for chemical laboratory safety practice--now features updates and new topics. This revised edition has an expanded chapter on chemical management and delves into new areas, such as nanotechnology, laboratory security, and emergency planning. Developed by experts from academia and industry, with specialties in such areas as chemical sciences, pollution prevention, and laboratory safety, Prudent Practices in the Laboratory provides guidance on planning procedures for the handling, storage, and disposal of chemicals. The book offers prudent practices designed to promote safety

and includes practical information on assessing hazards, managing chemicals, disposing of wastes, and more. Prudent Practices in the Laboratory will continue to serve as the leading source of chemical safety guidelines for people working with laboratory chemicals: research chemists, technicians, safety officers, educators, and students.

Policy Research in Educational Settings Jenny Ozga 1999-11-16 This book argues for independent, critical research on education policy in the context of attacks on the quality and usefulness of educational research in general. It takes issue with the argument, promoted by government departments and agencies that education policy research should be limited to work that assists policy-makers. Against this position, the book advocates independent, critical research that scrutinizes policy in relation to its consequences for equality and social justice. It argues that practitioners and academic researchers should form a research community that develops its own knowledge base from which so-called evidence based policymaking in education may be assessed and challenged. The book offers guidance on the theoretical and methodological resources available to practitioners and others with an interest in doing research on policy and discusses some of the main issues and problems in doing policy research on education. It offers examples of research on policy at different system levels, pursuing themes such as globalization, changing governance of education, selection, choice and exclusion, managerialism and the feminisation of educational management. It argues for attention to the history of policy in education as a resource for understanding the present, and concludes with recommendations for future research in areas where contestation of official agendas is needed.

Black Skin, White Masks Frantz Fanon 2019-10-03 Few modern voices have had as profound an impact as Frantz Fanon. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, *Black Skin, White Masks* is an unsurpassed study of the black psyche in a white world. Hailed for its scientific analysis and poetic grace when it was first published in 1952, it established Fanon as a revolutionary thinker and remains just as relevant and powerful today.

Catheter Ablation of Atrial Fibrillation Etienne Aliot 2011-08-31 Catheter Ablation of Atrial Fibrillation Edited by Etienne Aliot, MD, FESC, FACC, FHRS Chief of Cardiology, Hôpital Central, University of Nancy, France Michel Haïssaguerre, MD Chief of Electrophysiology, Hôpital Cardiologique du Haut-Lévêque, France Warren M. Jackman, MD Chief of Electrophysiology, University of Oklahoma Health Science Center, USA In this text, internationally recognized authors explore and explain the advances in basic and clinical electrophysiology that have had the greatest impact on catheter ablation of atrial fibrillation (AF). Designed to assist in patient care, stimulate research projects, and continue the remarkable advances in catheter ablation of AF, the book covers: the fundamental concepts of AF, origin of signals, computer simulation, and updated reviews of ablation tools the present practical approaches to the ablation of specific targets in the fibrillating atria, including pulmonary veins, atrial neural network, fragmented electrograms, and linear lesions, as well as the strategies in paroxysmal or chronic AF or facing left atrial tachycardias the special challenge of heart failure patients, the impact of ablation on mortality, atrial mechanical function, and lessons from surgical AF ablation Richly illustrated by numerous high-quality images, *Catheter Ablation of Atrial Fibrillation* will help every member of the patient care team.

The Milošević Trial Timothy William Waters 2015 The Milošević Trial - An Autopsy provides a cross-disciplinary examination of one of the most controversial war crimes trials of the modern era and its contested legacy for the growing fields of international criminal law and post-conflict justice. The international trial of Slobodan Milošević, who presided over the violent collapse of Yugoslavia - was already among the longest war crimes trials when Milošević died in 2006. Yet precisely because it ended without judgment, its significance and legacy are specially contested. The contributors to this volume, including trial participants, area specialists, and international law scholars bring a variety of perspectives as they examine the meaning of the trial's termination and its implications for post-conflict justice. The book's approach is intensively cross-disciplinary, weighing the implications for law, politics, and society that modern war crimes trials create. The time for such an examination is fitting, with the imminent closing of the

Yugoslav war crimes tribunal and rising debates over its legacy, as well as the 20th anniversary of the outbreak of the Yugoslav conflict. The Milošević Trial - An Autopsy brings thought-provoking insights into the impact of war crimes trials on post-conflict justice.

Nester's Microbiology Denise Gayle Anderson 2018 Textbook for Environmental Microbiology.

CALL Environments Joy Egbert 2007 When the first edition of CALL Environments was published in 1999 (Alexandria, VA: TESOL), it filled a distinct need for a computer assisted language learning (CALL) text focused specifically on second language acquisition (SLA). Much has happened in the world of technology since then, but the need to maintain this connection between research on both CALL and SLA still exists. This second edition continues to meet that need by highlighting new tools, discussing new research, and proposing new practical applications. And many of the chapters, which discuss topics such as visual literacy, critical thinking, and creativity, address content from the revised National Education Technology Standards for Students. As Egbert and Hanson-Smith point out, although technology presents a whole new language, the language of technology is not the most crucial information that educators need in order to use computers and the Internet effectively in their language classrooms. More important is an understanding of good pedagogy and the relationships among teaching, learning, and technological environments. This volume builds on the structure of the first edition, based on the eight conditions for optimal learning environments, by adding suggestions for projects and questions for reflection at the end of each chapter, as well as an index of terms used throughout the book.

Music and International History in the Twentieth Century Jessica C. E. Gienow-Hecht 2015-04-01 Bringing together scholars from the fields of musicology and international history, this book investigates the significance of music to foreign relations, and how it affected the interaction of nations since the late 19th century. For more than a century, both state and non-state actors have sought to employ sound and harmony to influence allies and enemies, resolve conflicts, and export their own culture around the world. This book asks how we can understand music as an instrument of power and influence, and how the cultural encounters fostered by music changes our ideas about international history.

Ways of Learning Alan Pritchard 2013-12-04 Whilst most teachers are skilled in providing opportunities for the progression of children's learning, it is often without fully understanding the theory behind it. With greater insight into what is currently known about the processes of learning and about individual learning preferences, teachers are better equipped to provide effective experiences and situations which are more likely to lead to lasting attainment. Now fully updated, *Ways of Learning* seeks to provide an understanding of the ways in which learning takes place, which teachers can make use of in their planning and teaching, including: An overview of learning Behaviourism and the beginning of theory Cognitive and constructivist learning Multiple intelligences Learning styles Difficulties with learning The influence of neuro-psychology Relating theory to practice The third edition of this book includes developments in areas covered in the first and second editions, as well as expanding on certain topics to bring about a wider perspective; most noticeably a newly updated and fully expanded chapter on the influence of neuro-educational research. The book also reflects changes in government policy and is closely related to new developments in practice. Written for trainee teachers, serving teachers, and others interested in learning for various reasons, *Ways of Learning* serves as a valuable introduction for students setting out on higher degree work who are in need of an introduction to the topic.

The Law and Practice of the International Criminal Court Carsten Stahn 2015 The International Criminal Court has significantly grown in importance and impact over the decade of its existence. This book assesses its impact, providing a comprehensive overview of its practice. It shows how the court has contributed to major developments in international criminal law, and identifies the ways in which it is in need of reform.

Art Entrepreneurship Ivo Zander 2011 This pioneering book explores creative and entrepreneurial processes as they are played out in the field of art. Nine original chapters by an international group of scholars take a detailed look at the sources of new art ideas, how they are transformed into tangible objects of art, make their way through often hostile selection environments, and ultimately go on to become valued and accepted by the general public. Making a number of original

contributions at the crossroads of art and entrepreneurship, the book speaks to researchers across these fields, practicing artists interested in promoting and gaining acceptance for their work, as well as policymakers concerned with sustained dynamics of the art arena.

Users' Guides to the Medical Literature Gordon Guyatt 2008-03-01
The "essential" companion to the landmark Users' Guides to the Medical Literature - completely revised and updated! 5 STAR DOODY'S REVIEW!
"This second edition is even better than the original. Information is easier to find and the additional resources that will be available at www.JAMAevidence.com will provide readers with a one-stop source for evidence-based medicine."--Doody's Review Service
Evidence-based medicine involves the careful interpretation of medical studies and its clinical application. And no resource helps you do it better-and faster-than Users' Guides to the Medical Literature: Essentials of Evidence-Based Clinical Practice. This streamlined reference distills the most clinically-relevant coverage from the parent Users' Guide Manual into one highly-focused, portable resource. Praised for its clear explanations of detailed statistical and mathematical principles, The Essentials concisely covers all the basic concepts of evidence-based medicine--everything you need to deliver optimal patient care. It's a perfect at-a-glance source for busy clinicians and students, helping you distinguish between solid medical evidence and poor medical evidence, tailor evidence-based medicine for each patient, and much more. Now in its second edition, this carry-along quick reference is more clinically relevant--and more essential--than ever!
FEATURES Completely revised and updated with all new coverage of the basic issues in evidence-based medicine in patient care
Abundant real-world examples drawn from the medical literature are woven throughout, and include important related principles and pitfalls in using clinical research in patient care decisions
Edited by over 60 internationally recognized editors and contributors from around the globe

Department of Defense Dictionary of Military and Associated Terms 1973
The Periodic Table Eric R. Scerri 2019
The periodic table of elements, first encountered by many of us at school, provides an arrangement of the chemical elements, ordered by their atomic number, electron configuration, and recurring chemical properties, and divided into periodic trends. In this Very Short Introduction Eric R. Scerri looks at the trends in properties of elements that led to the construction of the table, and shows how the deeper meaning of the table's structure gradually became apparent with the development of atomic theory and, in particular, quantum mechanics, which underlies the behaviour of all of the elements and their compounds. This new edition, publishing in the International Year of the Periodic Table, celebrates the completion of the seventh period of the table, with the ratification and naming of elements 113, 115, 117, and 118 as nihonium, moscovium, tennessine, and oganesson. Eric R. Scerri also incorporates new material on recent advances in our understanding of the origin of the elements, as well as developments concerning group three of the periodic table.
ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Nation Branding in Modern History Carolin Viktorin 2018-08-24
A recent coinage within international relations, "nation branding" designates the process of highlighting a country's positive characteristics for promotional purposes, using techniques similar to those employed in marketing and public relations. Nation Branding in Modern History takes an innovative approach to illuminating this contested concept, drawing on fascinating case studies in the United States, China, Poland, Suriname, and many other countries, from the nineteenth century to the present. It supplements these empirical contributions with a series of historiographical essays and analyses of key primary documents, making for a rich and multivalent investigation into the nexus of cultural marketing, self-representation, and political power.

National Policy on Vocational Education and Training Botswana 1997

Historical Origins of International Criminal Law Morten Bergsmo 2015-11-19

The Education System in Malawi World Bank 2010-02-25
'The Education System in Malawi', an Education Country Status Report (CSR), is a detailed analysis of the current status of the education sector in Malawi, the results of which have been validated by the government of Malawi. Its main purpose is to enable decision makers to orient national policy on the basis of a factual diagnosis of the overall education sector and to provide relevant analytical information for the dialogue between the government and development partners. The analysis incorporates data and information from multiple sources, such as school administrative surveys by the Ministry of Education, household surveys, and a tracer survey created especially for this study. This CSR, developed by a multi-ministerial national team supported by UNESCO P le de Dakar, the World Bank, and GTZ specialists, updates the previous one drawn up in 2003 and consists of eight chapters, including a chapter on higher education. The analysis provides key monitoring and evaluation inputs for the overall education sector, particularly under the framework of the implementation of the National Education Sector Plan.

Fragile Frontiers Saroj Kumar Rath 2015-06-03
Critical questions remain unanswered on the events of the cold-blooded and devastating terror attacks in Mumbai on 26 November 2008. Investigative and introspective, this book offers a lucid and graphic account of the ill-fated day and traces the changing dynamics of terror in South Asia. Using new insights, it explores South Asia's regional dynamics of antagonism, the ever-present challenge to the frontiers of India, Pakistan and the terrorism question, the strife in Afghanistan and the self-serving selective US 'war on terror'. This will be an engaging read for those interested in defence, security and strategic studies, politics, international relations, peace and conflict studies, and South Asian studies as well as the general reader.

Modes of Liability in International Criminal Law Marjolein Cupido 2019-07-31
Presently, many of the greatest debates and controversies in international criminal law concern modes of liability for international crimes. The state of the law is unclear, to the detriment of accountability for major crimes and of the uniformity of international criminal law. The present book aims at clarifying the state of the law and provides a thorough analysis of the jurisprudence of international courts and tribunals, as well as of the debates and the questions these debates have left open. Renowned international criminal law scholars analyze, in discrete chapters, the modes of liability one by one; for each mode they identify the main trends in the jurisprudence and the main points of controversy. An introduction addresses the cross-cutting issues, and a conclusion anticipates possible evolutions that we may see in the future. The research on which this book is based was undertaken with the Geneva Academy.

Empirical Bioethics Jonathan Ives 2016-12-22
Bioethics has long been accepted as an interdisciplinary field. The recent 'empirical turn' in bioethics is, however, creating challenges that move beyond those of simple interdisciplinary collaboration, as researchers grapple with the methodological, empirical and meta-ethical challenges of combining the normative and the empirical, as well as navigating the difficulties that can arise from attempts to transcend traditional disciplinary boundaries. *Empirical Bioethics: Theoretical and Practical Perspectives* brings together contributions from leading experts in the field which speak to these challenges, providing insight into how they can be understood and suggestions for how they might be overcome. Combining discussions of meta-ethical challenges, examples of different methodologies for integrating empirical and normative research, and reflection on the challenges of conducting and publishing such work, this book will both introduce the novice to the field and challenge the expert.

Culture and International History Jessica C. E. Gienow-Hecht 2004
Combining the perspectives of 18 international scholars from Europe and the United States with a critical discussion of the role of culture in international relations, this volume introduces recent trends in the study of Culture and International History. It systematically explores the cultural dimension of international history, mapping existing approaches and conceptual lenses for the study of cultural factors and thus hopes to sharpen the awareness for the cultural approach to international history among both American and non-American scholars. The first part provides a methodological introduction, explores the cultural underpinnings of foreign policy, and the role of culture in international affairs by reviewing the historiography and examining the meaning of the word culture in the context of foreign relations. In the second part, contributors analyze culture as a tool of foreign policy. They demonstrate how culture was instrumentalized for diplomatic goals and purposes in different historical periods and world regions. The essays in the third

part expand the state-centered view and retrace informal cultural relations among nations and peoples. This exploration of non-state cultural interaction focuses on the role of science, art, religion, and tourism. The fourth part collects the findings and arguments of part one, two, and three to define a roadmap for further scholarly inquiry. A group of "commentators" survey the preceding essays, place them into a larger research context, and address the question "Where do we go from here?" The last and fifth part presents a selection of primary sources along with individual comments highlighting a new genre of resources scholars interested in culture and international relations can consult.

The Brugada Syndrome Charles Antzelevitch 2008-04-15 Until recently, the cellular basis for sudden death, the Brugada Syndrome, has largely remained an unknown to modern arrhythmologists and cardiologists, particularly in the absence of any structural heart disease. Detailed observations of age-groups, especially the young, families and populations where sudden death frequently occurs, and improved understanding of its contributory factors and mechanisms are, however, showing the way forward. This addition to the Clinical Approaches to Tachyarrhythmias (CATA) Series, written by the investigators who discovered and probed the Brugada Syndrome, discusses the history, etiology, pathology and clinical manifestations of sudden death. From diagnosis, prognosis, to therapeutic approaches using the latest in catheter ablation techniques, electrophysiological surgery, and genetic appraisal, the work is a testimony to the author's investigation. Using clinical cases in Thailand and Laos, they further unravel the syndrome's molecular mechanisms, studying related syndromes, such as the long-QT syndrome, infant death, and arrhythmogenic right ventricular cardiomyopathy. By being informed of the electrophysiological abnormalities that contribute to familial and genetic diseases, physicians, cardiologists and all those who care for patients with cardiac arrhythmias will be better able to identify and treat patients in whom the Brugada Syndrome may strike next.

Fair Labelling and the Dilemma of Prosecuting Gender-Based Crimes at the International Criminal Tribunals Hilmi M. Zawati 2015-11 This scholarly legal work focuses on the dilemma of prosecuting gender-based crimes under the statutes of the international criminal tribunals with reference to the principle of fair labelling. In this book Hilmi M. Zawati explains how the abstractness and lack of accurate description of gender-based crimes in the statutory laws of the international criminal tribunals and courts infringe the principle of fair labelling, lead to inconsistent verdicts and punishments, and cause inadequate prosecution of these crimes. This inquiry deals with gender-based crimes as a case study, and with fair labelling as a legal principle and a theoretical framework. Critical and timely, this study contributes to existing scholarship in many different ways. It is the first legal analysis to focus on the dilemma of prosecuting and punishing wartime gender-based crimes in the statutory laws of the international criminal tribunals and the ICC in the context of fair labelling. Moreover, it emphasizes that applying fair labelling to wartime gender-based crimes would enable the tribunals and the ICC to deliver fair judgments, eliminate inconsistent prosecution, overcome shortcomings in addressing gender-based crimes within their jurisprudence, while breaking the cycle of impunity for these crimes. Consisting of two parts, this work begins by outlining the central focus and theoretical legal framework of the study. It concentrates on fair labelling as an imperative legal principle and a legal framework, examines its intellectual development, scope and justification, and illustrates its applicability to gender-based crimes. The second part addresses the dilemma of prosecuting gender-based crimes in the international criminal tribunals.

The Code of Capital Katharina Pistor 2020-11-03 "Capital is the defining feature of modern economies, yet most people have no idea where it actually comes from. What is it, exactly, that transforms mere wealth into an asset that automatically creates more wealth? The Code of Capital explains how capital is created behind closed doors in the offices of private attorneys, and why this little-known fact is one of the biggest reasons for the widening wealth gap between the holders of capital and everybody else. In this revealing book, Katharina Pistor argues that the law selectively "codes" certain assets, endowing them with the capacity to protect and produce private wealth. With the right legal coding, any object, claim, or idea can be turned into capital - and lawyers are the keepers of the code. Pistor describes how they pick and choose among different legal systems and legal devices for the ones that best serve their clients' needs, and how techniques that were first perfected centuries ago to code landholdings as capital are being used today to code stocks, bonds, ideas, and even expectations--assets that exist only in

law. A powerful new way of thinking about one of the most pernicious problems of our time, *The Code of Capital* explores the different ways that debt, complex financial products, and other assets are coded to give financial advantage to their holders. This provocative book paints a troubling portrait of the pervasive global nature of the code, the people who shape it, and the governments that enforce it."--Provided by publisher.

Teacher Evaluation and Student Achievement James H. Stronge 2000 This book discusses four approaches to incorporating student achievement in teacher evaluation. Seven chapters discuss: (1) "Teacher Evaluation and Student Achievement: An Introduction to the Issues"; (2) "What is the Relationship between Teaching and Learning?" (e.g., whether teachers are responsible for student learning and how to measure student learning); (3) "Assessing Teacher Performance through Comparative Student Growth: The Dallas Value-Added Accountability System"; (4) "Assessing Teacher Performance through Repeated Measures of Student Gains: The Tennessee Value-Added Assessment System"; (5) "Assessing Teacher Performance with Student Work: The Oregon Teacher Work Sample Methodology"; (6) "Assessing Teacher Performance in a Standards-Based Environment: The Thompson, Colorado, School District"; and (7) *Teacher Evaluation and Student Achievement: What are the Lessons Learned and Where Do We Go from Here?* (e.g., basic requirements of fair testing programs that are to be used to inform teacher evaluation). Chapters 3-6 include information on the purposes of the accountability system and how it was developed; student assessment strategies; how the accountability system works; how the accountability system relates to teacher evaluation; the advantages and disadvantages of the accountability system for teacher evaluation; and results of implementation. (Contains 66 references.) (SM)

Interpreters and War Crimes Kayoko Takeda 2021-03-23 Taking an interdisciplinary approach, this book raises new questions and provides different perspectives on the roles, responsibilities, ethics and protection of interpreters in war while investigating the substance and agents of Japanese war crimes and legal aspects of interpreters' taking part in war crimes. Informed by studies on interpreter ethics in conflict, historical studies of Japanese war crimes and legal discussion on individual liability in war crimes, Takeda provides a detailed description and analysis of the 39 interpreter defendants and interpreters as witnesses of war crimes at British military trials against the Japanese in the aftermath of the Pacific War, and tackles ethical and legal issues of various risks faced by interpreters in violent conflict. The book first discusses the backgrounds, recruitment and wartime activities of the accused interpreters at British military trials in addition to the charges they faced, the defence arguments and the verdicts they received at the trials, with attention to why so many of the accused were Taiwanese and foreign-born Japanese. Takeda provides a contextualized discussion, focusing on the Japanese military's specific linguistic needs in its occupied areas in Southeast Asia and the attributes of interpreters who could meet such needs. In the theoretical examination of the issues that emerge, the focus is placed on interpreters' proximity to danger, visibility and perceived authorship of speech, legal responsibility in war crimes and ethical issues in testifying as eyewitnesses of criminal acts in violent hostilities. Takeda critically examines prior literature on the roles of interpreters in conflict and ethical concerns such as interpreter neutrality and confidentiality, drawing on legal discussion of the ineffectiveness of the superior orders defence and modes of individual liability in war crimes. The book seeks to promote intersectoral discussion on how interpreters can be protected from exposure to manifestly unlawful acts such as torture.

Language and Communication Jack C. Richards 2014-06-06 Presents eight specially written chapters which provide a coherent survey of major issues in the study of language and communication, and which show how these are related to questions of practical concern in the learning and teaching of second and foreign languages. The issues discussed have been selected primarily for their relevance to applied linguistics, and there is a unifying interest in how language reflects the communicative functions it performs as well as in the process involved in using language for communication. Each chapter presents a self-contained survey of a central issue, is prefaced by an introduction linking the different perspectives, and is followed by discussion questions to aid effective use of the text in applied linguistics courses.
